

# DUNCAN COLLEGE ARTICLE: ROOM DRAW

## DUNCAN COLLEGE

### 1. ORDER OF ROOM DRAW

- (1) Outline of Room Draw Order
  - (a) General
    - (i) Room draw will be organized in such a way that there is sufficient time for a group who fails to receive a room in a given round of draw to re-organize and enter the next round.
  - (b) The order of the draws is listed below
    - (i) President
    - (ii) 5 Man Suites(5th B&C)
    - (iii) 6 Man Suites(2nd-5th A&D)
    - (iv) Open Suites(2nd-4th B&C)
    - (v) Singles
    - (vi) Doubles
- (2) Overview of the various draws
  - (a) President's Draw
    - (i) The president has first pick of any of the draw categories listed above and may populate the remaining beds with anyone he/she chooses so long as those people were not jacked.
    - (ii) The president does not have the power to bring people back who were jacked in room jack, or who chose to go off.
  - (b) 5 Man Suites(5th B&C)
    - (i) The two 5 man suites on the 5th floor will be drawn second. This is done in order to give groups that fail to draw either 5 man suite the opportunity to go in for 6 man suite draw.
  - (c) 6 Man Suites(2nd-5th A&D)
    - (i) The eight 6 man suites will be drawn third.
  - (d) Open Suites(2nd-4th B&C)
    - (i) Open suites may be drawn as groups of six, or eight people. Effectively giving each group the option to include the two singles outside the suite proper in their draw.
    - (ii) There is no preference in draw order as a result of how many people are going for a suite.
    - (iii) All open suites that are not drawn by groups will go into singles draw.
  - (e) Doubles
    - (i) The new O-Week Coordinators will communicate with the LVP and reserve doubles for freshman. The reserved freshman rooms must be distributed more or less evenly throughout all of the halls on floors 2 through 4. The LVP and O-Week Coordinators may choose to negotiate and change which rooms are reserved, but are under no obligation to do so. All non-reserved rooms are drawn in doubles draw.
    - (ii) In the event that more people want doubles than are available, an extra round of singles draw will be held after doubles draw.

### 2. ROOM SELECTION ORDER

- (1) General Outline
  - (a) The order in which people are given the chance to draw their rooms is based on point system rooted in seniority. In this document when a class is referred to by its rising status. Therefore, room draw is only concerned with sophomores, juniors, and seniors.
- (2) Point Values
  - (a) The point values are assigned as listed below.
    - (i) Seniors = 3
    - (ii) Juniors = 2

- (iii) Sophomores = 1
- (iv) Any student who failed to receive their freshmen point = 0
- (b) If someone is in their fourth year, but has not declared as a senior (Is planning on taking a 5th year and went through room jack as a junior) they will be classified as a Junior.
- (3) Ties and How they Function
  - (a) Every person brings a point value to a group; all of the point values of people going into draw together are averaged for a single group value.
  - (b) All room draws will be done in four tiers.
    - (i) People/Groups with a value 2.66 (Senior draw)
    - (ii) People/Groups with a value 1.66 (Junior draw)
    - (iii) People/Groups with a value 0.66 (Sophomore draw)
    - (iv) People/Groups with a value 0 (No Freshmen Point Draw)
  - (c) Once groups are sorted into tiers the groups in each tier are put into a randomized order to select rooms.
